

Fisher actuator mounted on CCI valve

Askalon has great experience of mounting Fisher actuators and FIELDVUE™ digital positioners on a wide range of valve brands.

Actuators are both diaphragm and piston types.

In case of problems with heat and vibrations split type positioner can solve the problems. This type of positioner is Fisher DVC6205/6215. Unit mounted on actuator only consists of magnetic feed-back for position. This feed-back unit is contact free and do not have any levers/ arms connected to valve stem.
