

TopWorx™ D-Series with ASCO Solenoid Valve.

The D-Series discrete valve controller with GO Switches and ASCO solenoid valve is the proven workhorse in the most demanding of applications. The first all Emerson on/off valve controller with the most reliable proximity switch and solenoid pilot valve on the market.

The Proven
Workhorse

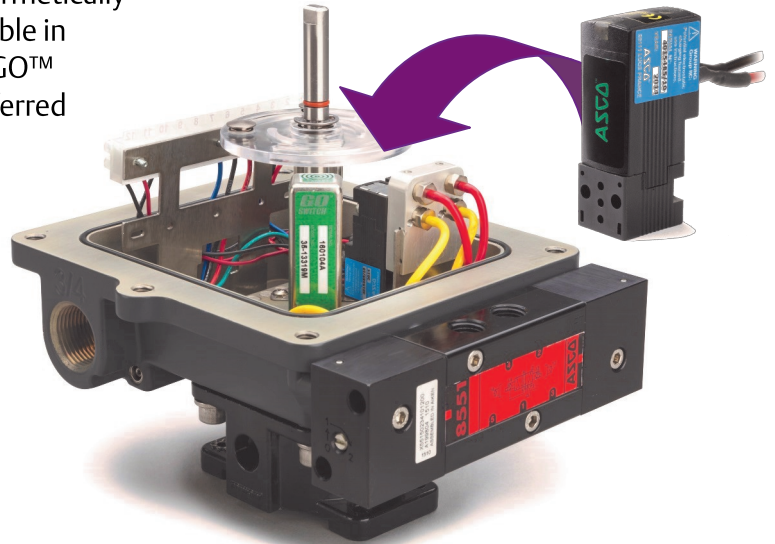

Have the confidence that your solenoid valve will work on demand.

The ASCO low powered solenoid valve offers considerable cost savings over the life of your process. Additional features include a quick response time, intrinsically safe approval, and internal mounting for protection from the environment. The ASCO Pilot offers the reliability and proven performance you expect.

Not all switches are created equal. GO Switches are hermetically sealed to outperform all other position sensors. Available in SPDT and DPDT options. SIL rated and approved, the GO™ Switch will perform in any application (Reference preferred part # DXP-L21GNES1A2).

GO Gets It.

D-Series with GO™ Switch Features and Benefits

- Available in Aluminum, 316 Stainless Steel and Engineered Resin
- Global Approvals:
 - IECEx, ATEX, NEC
 - Contact your local sales representative for Regional Certifications
- Up to four conduit entries (English or Metric)
- IP66/68 tested, NEMA 4, 4X
- Rated for 24VDC/3Amps, 120VAC/4Amps
- Immune to Electrical Noise
- Tested to operate up to 80°C and down to -60°C
